

Tree Propagation Workshop

Curriculum

Link:

Science/
Geography
KS1, 2, 3

1

Go out and **collect as many tree seeds** (conkers/acorns) as possible. We can supply seeds/saplings if this is not feasible.

2

Download our FREE **resources** on tree propagation from the website to get started with your group.

3

Plant the seeds and look after them until the saplings are ready to be **planted into the plant pots**.

4

We can take the saplings and **plant them in our allotment** in your name if you do not have the space.

5

Fundraise: Sell the saplings in their decorated pots to raise funds in the **Global Citizenship account** to be donated to the community project of their choice!
